Projects

Bank Application (Angular)

The Bank App is developed to manage the user's bank account. It contains functions such as register, login, deposit and withdraw. And also we can logout and delete our account. Here we use MongoDB, Express js and Node js to build the bank-end.

E-Commerce App (Angular-project)

Technology(s) Used: Angular, Node JS, Express JS, MongoDB

Here we can be able to search the needed product, add products to wishlist and cart. And it also contains a payment section.

Health-Mate (B.Tech final year project)

It is a real time health monitoring system. It will monitor real time ECG, Heartbeat rate, body temperature with the help of some electronic components and modules.

Aqua Pets Home using php (B.Tech Mini Project)

Aqua Peta Home is a website designed for selling ornamental fishes. The buyer can easily identify the quality products by checking the customer review.

Declaration

I hereby declare that the above particulars of facts and information stated are true, correct and complete to the best of my belief and knowledge.

pBOOK (An Android Application, Diploma Final Year Project)

pBOOK is an android application. It contains many study materials for polytechnic students. This application also provides the facility to calculate the CGPA point.
